YOUR PERSONAL PIECE OF PARADISE

ENTERTAINMENT AT YOUR DOORSTEP

THIS IS WHY WE STAND OUT

IMPERIAL
AVENUE

Imagine coming home to the most desirable address with unparalleled style and avant-garde amenities.

SOLAR PANELS

Solar panels have been installed on the roof for water heating, which provide for centrally heated water supply in individual apartments. This helps in maximising space and reduces the overall electricity and maintenance costs.

GREYWATER TREATMENT

For the first time in a residential building in Dubai, we have greywater treatment plants as a sustainable source of water for landscapes, common areas, car wash and toilet cisterns.

6D BIM

6D BIM, Building Image Model process, a transformational technology has been introduced for the first time in MEA. It helps bring down the maintenance cost substantially.

WATER PURIFIERS

Every apartment also has a drinking water purifier from Lux International, Switzerland, a leading brand in the European market. Such an amenity has been offered for the first time ever in residential apartments, in Dubai.

HIGH-SPEED ELEVATORS

Imperial Avenue has 13 high-speed elevators with a top speed of 4 meters per second, which means you can go from level 0 to level 45 in approximately 44 seconds, non-stop.

LPG CONNECTION

Every apartment has an LPG connection. This means we have attempted to move away from the electric cooking range, to go easy on your pocket.
